

Determining vulnerabilities of different ports

Port	Service	Vulnerability
20,21	FTP	Brute-forcing passwords Anonymous authentication Cross-site scripting Directory traversal attacks
22	SSH	Brute-forcing credentials
23	Telnet	Credential brute-forcing Credential sniffing Spoofing
25	SMTP	Spoofing Spamming
53	DNS	DoS DDoS
69	TFTP	No built-in authentication No built-in encryption
80	HTTP	XSS SQL Injection CSRF DDoS
110	POP3	Clear-text communication Credential Theft
123	NTP	NTP Amplification DDoS Attacks
143	IMAP	Clear-text communication Credential Sniffing
143	HTTPS	XSS SQL Injection CSRF DDoS
